

# CONCRETE VISIONS FROM FRITZ-PAK ADMIXTURES

As a concrete artist you can bring your ideas to life. Fritz-Pak offers you efficient tools to help make your concrete vision a reality. Packaged in patented water-soluble bags, and pre-measured, Fritz-Pak admixtures are easy to carry, are not temperature sensitive and can be tossed into a ready mix truck anywhere.

## MINI DELAYED SET

Mini Delayed Set slows down concrete set time. Use it on different portions of the pour so finishing crews can work at maximum efficiency. Ultimate strength is unaffected. Keep Mini-Delay on hand for times when unexpected delays occur at job site.

## CONTROL FINISH

Control Finish is a spray-on concrete finishing aid which greatly reduces the need for retempering with water on hot or windy days. It can be mixed at the jobsite with water in a sprayer, sprayed on and worked into the surface. It creates a smooth, exceptionally workable surface for stamping or other final decorative effects. It eliminates or greatly reduces surface problems associated with too much water, plastic shrinkage cracks, dusting, crazing and crusting.

## COUNTER-FLO

Counter-Flo is an admixture especially created for countertops. It is also perfect for small pours like statuary. It increases strength while permitting faster demolding and cure times. The finished product is denser and less permeable. Counter-Flo aids placement by producing a buttery mixture to work with. Air bubbles are reduced, yielding better pattern definition in the finished work.

## SUPERCIZER 5

Supercizer 5 increases slump, reduces water and produces stronger concrete. Bleed water is lessened, resulting in fewer shrinkage cracks. Cohesiveness is improved and concrete segregation reduced. It offers ease of placement even in difficult access or heavily reinforced areas, giving you maximum workability. Added before or with dry colors, Supercizer 5 creates much better color dispersement. It gives a strong smooth slab: the surface you want for stamping or engraving. Let Supercizer 5 work on concrete quality, leaving you free to focus on creating your decorative piece.

## Use Fritz-Pak Admixtures to Create Your Concrete Canvas

**SUPERCIZER 5** - Superplasticizer for a strong, smooth slab.

**MINI-DELAYED SET** - Use to retard different portions of the pour, perfect for "Step Retardation".

**CONTROL FINISH** - Flatwork finishing aid for a perfect surface for stamping or staining. Reduces cracks.

**NEW! COUNTER-FLO** - Admixture for durable, smooth, high-strength concrete designed for concrete countertops & other small pours.
