

MOST INNOVATIVE PRODUCT 2003

GO WITH THE WINNER!!.....RESCUE-PAK, the concrete admixture kit for field corrections, was voted Most Innovative Product by a panel of industry experts and by World of Concrete 2003 attendees. Why? Because Fritz-Pak products are reliable and easily added at the job site. You Can Fix the Mix when it isn't exactly right. Add superplasticizer, set retarder, slump reducer, pumping aid, or air entrainer and get the load the way you need it without costly delays.

Packaged in patented water soluble bags

EXTEND THE LIFE OF YOUR CONCRETE

Mini Delayed Set and Standard Delayed Set

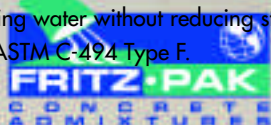

When it's hot outside, or when unexpected delays occur, you need a set retarder - **NOW**. Carry Mini Delayed Set and Standard Delayed Set so you can slow down set time when you need it. Also use as an overnight wash water stabilizer to avoid the need for reclaimers.

IMPROVE WORKABILITY WITH LESS WATER

Supercizer 5

When you need more workability at the job site, don't add water! That raises your water:cement ratio and weakens your concrete. Add our high performance superplasticizer Supercizer 5 to get the same effect as adding water without reducing strength. Meets ASTM C-494 Type F.

DRY UP A WET LOAD

Super Slump Buster

This water thickener (viscosity-modifying admixture) reduces concrete slump in a matter of minutes. It does not change concrete strength, set time or water:cement ratio. Use it whenever lower slumps are needed for job site workability. Perfect for slip-forming.
